Office Action Summary	Application No. 10/040,287	Applicant(s) CARLSON ET AL.	
	Examiner Mark W. Bockelman	Art Unit 3762	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 9-11, 16, 29-33, 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Carlson et al USPN 5,792,195. Carlson et al teach a method of detecting QRS complexes as well as S2 heart sounds for establishing an upper rate hemodynamic. As noted in the corresponding search report PCT/US02/32891 no atrial sensing is performed in the claim and thus the maximal hemodynamic rate (which correlates with a heart rate) in Carlson et al is interpreted as a maximal atrial tracking rate since the ventricular stimulation can stimulate no faster than the established rate and thus will not stimulate at higher atrial frequencies. Carlson tracks. The examiner considers the S3 time to be a rate offset. The pacing can be interpreted as an tachyarrhythmia therapy.

Claims 1 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Spinelli USPN 5,235,976. As acknowledged in applicant's specification Spinelli teach a method of establishing an upper rate hemodynamic limit in a similar way as applicant's method. While applicant recites a maximal atrial tracking rate, the

Art Unit: 3762

examiner applies a similar interpretation to the Spinelli disclosure as in Carlson et al.

Allowable Subject Matter

Claims 6-8, 12-14, 34-36, 40-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
